CARACTERÍSTICAS PRINCIPALES ---- MAJOR CHARACTERISTICS	
Structure of Doctoral Networks	<p>1. Doctoral Networks Standard (DN): Networks will raise the attractiveness and excellence of doctoral training in Europe. They will equip researchers with the right combination of research-related and transferable competences and provide them with enhanced career perspectives in both the academic and non-academic sectors through international, interdisciplinary and inter-sectoral mobility combined with an innovation-oriented mind-set.</p> <p>2. Industrial Doctorates (DN-ID): Through Industrial Doctorates, doctoral candidates will step outside academia and develop skills in industry and business by being jointly supervised by academic and non-academic organisations, both of which can be established in the same EU Member State or Horizon Europe Associated Country</p> <p>3. Joint Doctorates (DN-JD): Joint Doctorates represent a highly integrated type of international, inter-sectoral and multi/interdisciplinary collaboration in doctoral training. They lead to the delivery of joint, double or multiple doctoral degrees^[3] recognised in at least two EU Member States or Horizon Europe Associated Countries.</p>
Eligibility	All researchers recruited in a DN must be doctoral candidates (i.e. not already in possession of a doctoral degree at the date of the recruitment) and undertake transnational mobility rule. Researchers who have successfully defended their doctoral thesis but who have not yet formally been awarded the doctoral degree will not be considered eligible. For all recruitments, the eligibility of the researcher will be determined at the date of their first recruitment in the action. This status will not evolve over the lifetime of the action, even if they are re-recruited at another beneficiary.
