

NEW CALL	
CALL DETAILS	
Title	ERC-2023-ADG
Aim	ERC Advanced Grants are designed to support excellent Principal Investigators at the career stage at which they are already established research leaders with a recognised track record of research achievements. Principal Investigators must demonstrate the ground-breaking nature, ambition and feasibility of their scientific proposal
Funding body	EUROPEAN COMMISSION
Deadline	23 May 2023 17:00:00 Brussels time
MAJOR CHARACTERISTICS	
Financial support	Advanced Grants may be awarded up to a maximum of EUR 2 500 000 for a period of 5 years (the maximum award is reduced pro rata temporis for projects of a shorter duration). However, up to an additional EUR 1 000 000 can be requested in the proposal to cover (a) eligible "start-up" costs for Principal Investigators moving to the EU or an Associated Country from elsewhere as a consequence of receiving the ERC grant and/or (b) the purchase of major equipment and/or (c) access to large facilities and/or (d) other major experimental and field work costs, excluding personnel costs. (As any additional funding is to cover major one-off costs it is not subject to pro-rata temporis reduction for projects of shorter duration. All funding requested is assessed during evaluation)
Eligibility	Principal Investigators of Advanced Grant proposals will be expected to demonstrate a record of achievements appropriate to the field and at least matching one or more of the following benchmarks: 10 publications as main author (or in those fields where alphabetic order of authorship is the norm, joint author) in major international peer-reviewed multidisciplinary scientific journals, and/or in the leading international peer-reviewed journals and peer-reviewed conferences proceedings of their respective field; 3 major research monographs. This benchmark is relevant to research fields where publication of monographs is the norm. Other alternative benchmarks that may be considered (individually or in combination) as indicative of an exceptional record and recognition in the last 10 years: 5 granted patents; 10 invited presentations in well-established internationally organised conferences and advanced schools; 3 research expeditions led by the applicant Principal Investigator; 3 well-established international conferences or congresses where the applicant was involved as a member of the steering and/or organising committee; International recognition through scientific or artistic prizes/awards or membership in well-regarded Academies or artefact with documented use (for example, architectural or engineering design, methods or tools); Major contributions to launching the careers of outstanding researchers; Recognised leadership in industrial innovation.
APPLICATION PROCEDURE	
Application materials	<p>The electronic submission system is an online wizard that guides you step-by-step through the preparation of your proposal. The proposal itself consists of 2 main parts:</p> <ul style="list-style-type: none"> administrative forms (structured information of the basic administrative data, declarations of partners, organisations and contact persons, etc.) technical annex, which is the detailed description of the planned research and innovation project outlining work packages, costs, etc. Further mandatory or optional annexes (e.g. supporting documents for ethics issues, detailed budget table for lump sum pilot projects) can be required by the call and the given topic, as shown in the submission system.
ADDITIONAL INFORMATION	
Additional information	Todos los proyectos deben contar con la aprobación de la Oficina de Investigación Responsable (OIR). El trámite se ha de solicitar en fase solicitud a través de: https://oir.umh.es/solicitud-de-evaluacion
Manager OTRI	For further support, please contact Francisca Leyva: pleyva@umh.es ext: (2130)
